### APPLICAZIONI

Rimozione di sedimenti, sabbia, particelle in sospensione; filtrazione di acque di processo, bagni galvanici, industria fotografica; protezione addolcitori domestici ed industriali, protezione membrane in sistemi di osmosi inversa; filtrazione di liquidi compatibili con il polipropilene.

### APPLICATIONS

Removal of sediments, sand, suspended particles; filtration of process waters, plating industries waters, photography processing; pre filtration protection of domestic and industrial water softeners, pre filtration stage in reverse osmosis units; filtration of liquids compatible with the polypropylene.

### DATI TECNICI / TECHNICAL DATA

Temperatura max d'esercizio / Max operating temperature

50° c

Pressione differenziale max / Max differential pressure

0,15 bar

Gradi di filtrazione / Nominal filtration rates available

1-5-10-20-50-100 µ

Costruita con polipropilene 100% puro approvato FDA, materiale atossico senza collanti.  
Made of 100% pure polypropylene FDA approved, non-toxic material, without adhesives.
